

KUDAKWASHE CHIKUMBU

Computer Science Student | Backend Engineer

Address: 34 13TH Crescent Warren Park 2, Harare, Zimbabwe
Phone: +263 78 161 8359
Email: chikumbukudakwashe@gmail.com

SUMMARY

Results-oriented Backend Engineer and Computer Science student seeking opportunities to apply expertise in designing, developing, and deploying scalable backend systems and APIs. Proven track record in problem-solving, system implementation, and project execution across web, robotics, and educational environments. Adept at leveraging modern backend frameworks and technologies to optimize performance, reliability, and overall system efficiency.

WORK EXPERIENCE

Robotics & Emerging Technologies Instructor , Zimbabwe Flying Labs Jan 2026 - Present

- Designed and delivered hands-on lessons in robotics, programming, IoT, and foundational AI.
- Guided learners through real-world applications using sensors, actuators, and microcontrollers.
- Fostered creativity, problem-solving, and critical thinking through project-based learning.

Projects Manager, Google Developer Groups On Campus, University of Zimbabwe 2025 - Present

- Lead planning and execution of technical projects and events, including workshops and hackathons,
- Coordinate teams and mentor students to develop skills in backend development, software engineering, and emerging technologies.

Software Engineer Intern, Prodigy InfoTech Jan 2025 - Feb 2025 | Remote

- Developed and maintained Python-based systems to support project requirements.
- Worked with structured codebases and version control in a remote environment.

Robotics & Programming Instructor, Golden Tree System Developers Jun 2024 - Dec 2024

- Developed lesson plans and delivered hands-on robotics and programming workshops.
- Used Arduino platforms to teach electronics and programming fundamentals.

Web Development Projects

- groutxinvestments.co.zw_ – Corporate website design and deployment
- theissi.org – Organizational website with structured content and navigation
- younganddynamic.co.zw – MVP platform for a leadership and youth development club
- elroithreads.co.zw – Business website for a fashion brand

Developed and deployed responsive web applications with Django and Django REST Framework, ensuring usability, performance, and clean UI, while managing hosting and updates.

EDUCATION

Bachelor of Science in Computer Science Aug 2024 - Aug 2028

University of Zimbabwe

- Focus on backend engineering, API design, and scalable software systems
- Academic exposure to data structures, databases, and system design

ADDITIONAL INFORMATION

- **Technical Skills:** Backend Development, RESTful API Design, Django & Django REST Framework, FastAPI, Database Design & Integration, Web Application Development, Robotics & Automation Systems, IoT Fundamentals, Linux-Based Development, Git & Version Control
- **Programming Languages:** Python, JavaScript (basic), C++ (basic), Node.js (basic), Java (basic)
