

KUDAKWASHE CHIKUMBU

Backend Engineer | Computer Science Student

Harare, Zimbabwe | +263 78 161 8359 | chikumbukudakwashe@gmail.com | vachikumbu.com

PROFESSIONAL SUMMARY

Results-driven Backend Engineer and Computer Science student with demonstrated expertise in designing, developing, and deploying scalable backend systems and RESTful APIs. Proven ability to deliver full-stack web applications, lead technical teams, and deliver effective technology education. Proficient in Python, Django, and FastAPI with hands-on experience across web development, robotics, IoT, and software engineering education.

TECHNICAL SKILLS

Backend Frameworks: Django, Django REST Framework, FastAPI

Programming Languages: Python (proficient), JavaScript, C++, Node.js, Bash, Java (foundational)

Core Competencies: RESTful API Design, Database Design & Integration, Web Application Development, Git & Version Control, Linux-Based Development

Emerging Technologies: Robotics & Automation Systems, IoT, Arduino, Sensors & Microcontrollers, Foundational AI

WORK EXPERIENCE

Robotics & Emerging Technologies Instructor | *Zimbabwe Flying Labs* Jan 2026 – Present

- Design and deliver hands-on curriculum covering robotics, programming, IoT, and foundational AI concepts to diverse learners.
- Guide learners through real-world applications using sensors, actuators, and microcontrollers in project-based environments.
- Foster critical thinking, problem-solving, and creativity through structured, outcome-driven lessons.

Projects Manager | *Google Developer Groups On Campus – University of Zimbabwe* 2025 – Present

- Lead end-to-end planning and execution of technical events including workshops, hackathons, and developer meetups.
- Coordinate cross-functional student teams and mentor peers in backend development, software engineering, and emerging technologies.
- Drive student engagement with the wider Google developer ecosystem and open-source community.

Software Engineer Intern (Remote) | *Prodigy InfoTech* Jan 2025 – Feb 2025

- Developed and maintained Python-based software systems to meet project specifications within a remote team environment.
- Worked within structured codebases, applying version control best practices using Git.

Robotics & Programming Instructor | *Golden Tree System Developers* Jun 2024 – Dec 2024

- Developed lesson plans and facilitated hands-on robotics and programming workshops for learners of varying skill levels.
- Taught electronics and programming fundamentals using Arduino platforms, bridging theory with practical application.

PROJECTS

Web Development – Deployed Client Websites

- groutexinvestments.co.zw – Corporate website design and full deployment for an investment firm.
- theissi.org – Organizational website with structured content management and navigation.

- younganddynamic.co.zw – MVP platform built for a youth leadership and development club.
- elroithreads.co.zw – Business website for a fashion brand with product showcase functionality.

Developed and deployed all projects using Django and Django REST Framework, managing hosting, performance optimization, and ongoing updates.

EDUCATION

Bachelor of Science in Computer Science | *University of Zimbabwe* Aug 2024 – Aug 2028
(Expected)

- Specialization focus: Backend Engineering, API Design, and Scalable Software Systems.
- Core modules: Data Structures & Algorithms, Database Systems, System Design, and Computer Networks.
