

KUDAKWASHE CHIKUMBU

Backend Engineer | Computer Science Student

Harare, Zimbabwe • +263 78 161 8359 • kudakwashe@vachikumbu.com • vachikumbu.com • github.com/chikumbu-kudakwashe

PROFESSIONAL SUMMARY

Results-oriented Backend Engineer & CS Student specializing in the architecture of scalable systems and RESTful APIs. With a toolkit centered on Python, Django, and FastAPI, I bridge the gap between complex backend logic and seamless user experiences. Beyond the terminal, I lead technical teams and mentor the next generation of engineers, bringing a unique perspective from the intersection of IoT and robotics.

TECHNICAL SKILLS

Backend Frameworks: Django, Django REST Framework, FastAPI

Programming Languages: Python (proficient), JavaScript, Java (Basic), Bash, TypeScript

Core Competencies: RESTful API Design, Database Design & Integration, Web Application Development, Git & Version Control, Linux-Based Development

Emerging Technologies: Robotics & Automation, IoT, Arduino, Sensors & Microcontrollers, Foundational AI/ML

Soft Skills: Team Leadership, Technical Mentorship, Problem-Solving, Public Speaking, Research

WORK EXPERIENCE

Robotics & Emerging Technologies Instructor | *Zimbabwe Flying Labs* Jan 2026 – Present

- Design and deliver hands-on curriculum covering robotics, programming, IoT, and foundational AI to diverse learners.
- Guide participants through real-world applications using sensors, actuators, and microcontrollers in project-based settings.
- Foster critical thinking and creativity through structured, outcome-driven lesson plans.

Projects Manager | *Google Developer Groups on Campus – University of Zimbabwe* 2025 – Present

- Lead end-to-end planning and execution of technical events including workshops, hackathons, and developer meetups.
- Coordinate cross-functional student teams and mentor peers in backend development and software engineering.
- Drive student engagement with the Google developer ecosystem and the open-source community.

Backend Developer | *Freelance* Jan 2024 – Present

- Architected and deployed scalable RESTful APIs using FastAPI and Django REST Framework, enabling high-throughput, low-latency client-server communication.
- Designed and managed relational database schemas (PostgreSQL/MySQL) with advanced indexing and query optimization, reducing server response times by over 30%.
- Implemented asynchronous task processing using Celery and Redis to offload background jobs and improve overall application responsiveness.

Software Engineer Intern (Remote) | *Prodigy InfoTech* Jan 2025 – Feb 2025

- Developed and maintained Python-based software systems to meet project specifications within a remote team environment.
- Applied version control best practices using Git within structured, collaborative codebases.

Robotics & Programming Instructor | *Golden Tree System Developers* Jun 2024 – Dec 2024

- Developed lesson plans and facilitated hands-on robotics and programming workshops for learners of varying skill levels.
- Taught electronics and programming fundamentals using Arduino platforms, bridging theory with practical application.

EDUCATION

Bachelor of Science Honors in Computer Science | *University of Zimbabwe* Aug 2024 – Aug 2028 (Expected)

- Specialization: Backend Engineering, API Design, Machine Learning, and Scalable Software Systems.
- Relevant Coursework: Data Structures & Algorithms, Database Systems, System Design, Computer Networks.

CERTIFICATIONS

Neural Networks and Deep Learning | *Coursera (DeepLearning.AI)*

In Progress (Expected Oct 2026)

Harvard CS50 AI | *EdX*
